

Exploring Possible Sparks with Your Mentee

The best spark gift you can give your mentee is to provide him or her with lots of opportunities to try or experience new things; that way, each young person has a good chance of finding his or her own special interests. The more he or she can try, the better!

You can use the chart on the back to help you expand your mentee's spark options. Together, check off the activities your mentee has experienced at least once, but remember that repeated experiences are also useful. You can also check the chart to generate new ideas when you're ready to plan an activity for or with your mentee.

None of the activities has to be expensive or hard to do. Use these tips to help you:

- Libraries often have free passes to local museums, parks, or events; ask the librarian at your local library what they have to offer.
- Libraries also provide books on every spark under the sun. A librarian can steer you to the appropriate section for browsing. Remember that your best bet might be a magazine or web site, not only a book.
- After-school programs offer a variety of activities that can help kids explore new interests; after you fill in the chart on the back, think about what organizations might offer programs that match the sparks named by your mentee.
- Keep an eye out for holiday or festival events that are free to the public. If your town has a Cinco de Mayo celebration, Chinese New Year or other ethnic events, you and your mentee likely can experience a great variety of dance, song, and food there.
- College campuses can offer a range of possibilities. They often have free art galleries, arts events, sports events or practices to watch, displays in the science buildings, and so on.
- Identify your own spark and share it. Even if your sparks don't match, sharing what you are passionate about helps deepen your relationship.
- Many parks are free to the public; and walks in the park together cost nothing. If your mentee has an interest in the outdoors, or geology, or birds, or running, parks offer many options to explore. Also consider local nature preserves, arboretums and other local outdoor sites.

Activity Ideas for Exploring Possible Sparks

Activity	Tried it!	Activity	Tried it!
Strummed a guitar, played a piano, tried a drum		Painted a picture, molded something out of clay, drew a picture	
Saw a band concert, listened to an orchestra, sang in a chorus		Attended a play, attended a musical	
Read or heard poetry, then wrote my own		Read or heard a story, then wrote my own	
Saw different kinds of dance, including ballet, flamenco, ballroom, or modern		Learned words in a language other than my family's main language	
Learned how to cook or bake something		Learned how to build or repair something	
Tried karate, break dancing, or rapping		Tried a team sport like soccer, basketball or softball	
Played tennis or attended a gymnastics class		Gazed at the stars and tried to find the constellations	
Went swimming or rock climbing		Saw a parade or was in a parade
